

DIRECTIONS: Respond fully to the extended constructed response questions that follow. Show your work and clearly explain your answers. You will be graded on the correctness of your methods as well as the accuracy of your answers.

- Wendy drew the letter \sqsubset on a coordinate grid and performed a series of transformations on it to produce the upside-down image of the \sqsubset .

- Describe a series of transformations that could result in the image of the figure at the right.

- Is this the only possible series of transformations?
